Service-Enriched Living

Thrive at Home

The Club at St. Cloud is a senior living community where members receive essential supportive care so they can thrive. Our caring staff is committed to helping members maintain their independence while fostering a genuine sense of purpose and belonging. For families, just knowing their loved one is being treated with the love and respect they deserve in a safe environment, provides peace of mind.

A Growing Family of Close-Knit Communities

The Club at St. Cloud is owned and operated by Innovation Senior Living, a premier operator of assisted living communities with more than 125 combined years of experience. As with each of its sister properties, The Club at St. Cloud integrates high quality care and technology with familial values. It's what makes our community feel so safe and inviting, just as home should be.

The Club at St. Cloud has 25,000 square feet of living space, suitable for 52 members. Each unit is well-appointed for comfort. We offer an array of activities to enrich the mind and keep the body healthy.

Personalized for More Meaningful Moments

At the heart of our member-centered care approach is the individualized care plan. Before move-in, our team meets with the member and family. Together we build a comprehensive, customized program based on the member's interests and needs.
